True Love

Robert Palmer

If I?m not mistaken, my whole universe was shaken
When I fell for you 'coz all the stars collided
When I held you in my arms, I knew you were the one
I was searching for perfection, babe but love is the exception
That proves all the rules, there?s a sensuality that only
You have shown to me that steals my breath away
And by the way, baby
If there?s something that I care about, it?s true love
And no matter where you are, you are my true love
And I thank the lucky stars above for true love
There was never any doubt about it, true love
And it?s you, love
Total satisfaction, irresistible attraction
I got no excuse, I live in anticipation of your
Unforeseen temptations, what you gonna do?
I don?t have an explanation, you?re the only invitation
I cannot refuse and handsome is as handsome does
And you win hands down baby doll, you got it nailed
And by the way, baby
It don?t matter where you are, you are my true love
There was never any doubt about it, true love
And I thank the lucky stars above for true love
If there?s one thing I can?t live without, it?s true love
And it?s you, love
If I?m not mistaken, my whole universe was shaken
When I fell for you 'coz all the stars collided
When I held you in my arms, I knew you were the one
And by the way, baby
If there?s something that I care about, it?s true love
And no matter where you are, you are my true love
And I thank the lucky stars above for true love
There was never any doubt about it, true love
All the tragedy and irony of true love
All the agony and ecstasy of true love
It don?t matter where you are, you are my true love
There was never any doubt about it, true love
It don?t matter where you are, you are my true love
There was never any doubt about it, true love
And I thank the lucky stars above for true love

If there?s one thing I can?t live without, it?s true love
If there?s something that I care about, it's true love
And no matter
