We Are the Future

Stratovarius

What is wrong with a man
Destroying the land?
Our planet is full of wasteSheltering ozone layer
Is no more a shield
The temperature's rising upNow, it's time to stop this madness
Preventing increasing sadness
Let's put end to all this while we canMan again's another man
How somebody can
Judge by color of the skinSee the signs make up your own mind
Now, it's time for the change
It is not too lateNow, it's time to stop this madness
Preventing increasing sadness
Let's put end to all this while we canSave us, we are the future
Lead us into the better world now
Show us the way to reality
No more injustice or cruelty, nowSave us, we are the future
Lead us into the better world now
Show us the way to reality
Injustice is all goneFast, fast, stop, this course now
Last, last or we won't last
Past, stop living in the past
Or you will dieEnd, end of our time
Time our precious time
Crime, crime against mankind
We have to payIn the course of mad destruction
There'll be no coming back
The nuclear end is in sight
Soon there will be no one to fight withTake a look in to the sky
It may be your last time
The complete end is in sight
Soon there will be no one to fight withSave us, we are the future
Lead us into the better world now
Show us the way to reality
No more injustice or cruelty, nowSave us, we are the future
Lead us into the better world now
Show us the way to reality
Injustice is all gonePlease, no more
