

# Dangerous Toy (Mike Soliz on Vocals - rare)

## Watchtower

Can a device read your mind?  
To be accused of misinformation  
Is the subject clean, and machine  
Guilty of distorted imagination?  
A psychological change  
Assumes relation to the act of deceit  
Not legally accepted  
Human judgement is considered  
A pleading man resists malicious observation  
The electric chair misinterprets lies detected  
A voluntarily accepted examination  
His freedoms, rights, and privacy neglected  
Could a dangerous toy be infallible?  
An assembly in a state of suspense  
Why should we account for its mistakes  
And suffer the consequence?  
A question of control  
Will produce the fear of anxiety  
Further abuse of security  
We ignore implications for a free society  
The slightest glitch proves fatal - if swallowed  
Calculated emotions and expressions  
Claims of accuracy diminish  
Inconclusive evidence left to its discretion
