

# Mayhem

## Namco Sounds

Endless war, endless screams  
In the boundaries of hell we live  
Total death, total hate  
On the devastated plains we fight Evil minds, insane minds  
Mutilated corpses over the ground  
Soldiers of hell, soldiers of death  
Seeking victims to exterminate Black death, black night  
Where the spirits leave their crypts  
Tortured souls, drifting souls  
By the world of hate Multi radiation, multi death  
Destroys and kills even in the deep of hell  
Fallen corpses, fallen angels  
Total injury is the only rule Mayhem Death slaughter, death rules  
Under the sign of fear we live  
Bestial lust, bestial rites  
Darkness send it's bestial warriors Shrill cries, tormenting cries  
Break the silence of the dark night  
Living with hate, living with death  
Giving the world total destruction Blood world, rotting world  
Corrosion of the insane human mind  
Black pest, devastating pest Under the evoking circle we pray  
Baptized skull, evil skulls  
People screaming, chained underground Mayhem
