

# De-Energized

## After Forever

You fake, you give nothing but misery  
You are reluctant in your vanity  
Your eyes are blinded by your conceit  
You turn my fire into negative energy! You are estranged by your jealousy  
A weakness in your personality  
Your lack of social skills annoy me  
You fuel my hate by your negative energy! I see a false alliance causing all this pain  
I see a sick relation ending up in vain  
I see a world at war because of pride and might  
I feel we're all getting de-energized! I am amazed by your ability  
To make me feel all this insanity  
I am discouraged by your falsity  
You sink so low to get things done your way! I see a false alliance causing all this pain  
I see a sick relation ending up in vain  
I see a world at war because of pride and might  
I feel we're all getting de-energized! Unwilling, absent, dissenting  
Conflicting, adverse, annoying  
You're cureless, painless, disgusting  
False, ruthless, blinded, recusant! You damage, injure and destroy  
Unbalanced, troubled and unfaithful  
You're senseless, heartless and fearless  
Cold, hostile, distant and empty  
You're a freak! You won't get closer to my dignity  
Something you've lost, just like empathy  
I won't degrade to your pathetic ways  
Nor let you take any more positive energy! I see a false alliance causing all this pain  
I see a sick relation ending up in vain  
I see a world at war because of pride and might  
I feel we're all getting de-energized
