

Gimme Something

Granger Smith

Hey DJ

Hey Sunset

Hey Full Moon creeping up over them pines in

The distance

Hey summer breeze

Hey two lane road

I gotta girl that means the world to me

And if you wanna help me let her know Gimme something she can dance to, throw up her hands to

Running through her hair falling down

Gimme something that'll take her breath away

And make her think that heavens right here, right now

Something that'll get those eyes looking at me

like, she's falling harder than the stars tonight

Anything to turn the space that's in between us into nothing

C'mon gimme something

Yeah

'Cause if it's the right song and just the right light

That circle in the sky won't be the

Only thing getting high tonight, nah

I don't need much but I'm counting on you

To set the mood with the groove and a

hell of a view, so I can make my move Gimme something she can dance to, throw up her hands to

Running through her hair falling down

Gimme something that'll take her breath away

And make her think that heavens right here, right now

Something that'll get those eyes looking at me

like, she's falling harder than the stars tonight

Anything to turn the space that's in between us into nothing

C'mon gimme something, yeah

Oh, c'mon gimme something, yeah I get to pick it up and drive it out to finding that spot nobody knows

So, c'mon, c'mon don't let me down

I don't wanna take her home

Gimme something she can dance to, throw up her hands to

Running through her hair falling down

Gimme something that'll take her breath away

And make her think that heavens right here, right now

Something that'll get those eyes looking at me

like, she's falling harder than the stars tonight

Anything to turn the space that's in between us into nothing

C'mon, gimme something, yeah
C'mon, gimme something, yeah
C'mon, gimme something
Gimme somethin
