

Freeze Time

Braiden Wood

If we had the chance to go back in time
I'd bring back friends that were left behind
Try to sleep, try to keep that poker face in line
We're so young, how strong, but there's no rewind Sometimes I don't know what to say
There aren't enough hours in a day
The time on the clock ticks away
And life fits you with a slight delay We still have hope to get it right
Be free, be strong Let's go out in the world tonight
Explore the stars and see the lights
Let's find something worth living for
Together, we have so much more With you, I feel like I could find
When time slows down, you know it's right
Girl, you freeze time
Girl, you freeze time Lost keys, scraped knees, the song is sung
We dance, dance, no 'rents, what could go wrong
May nights will fight, go on and on
I knew this would happen, all along Step outside, it's just you and me
Seems to me like we were meant to be
Broken homes make it hard to see
That won't change what we believe We still have hope to get it right
Be free, be strong Let's go out in the world tonight
Explore the stars and see the lights
Let's find something worth living for
Together, we have so much more With you, I feel like I could find
When time slows down, you know it's right
Girl, you freeze time We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right
We still have time to get it right
We still have time to get this right Let's go out in the world tonight
Explore the stars and see the lights
Let's find something worth living for

Together, we have so much more
With you, I feel like I could find
When time slows down, you know it's right
Girl, you freeze time
Girl, you freeze time
Woah
Girl, you freeze time
