

Can The Freedom Regulate The Volume?

Bolt Action Five

Those little words
That i say to you
A little hurt, we'll try not to do
A little thing we'll try to avoid
And you get mad
Are you hurt from mine
And mine
The fire was burning but the leader got out
We take that medicine and you split it up
The fire was burning just as long as it keeps
Tonight falls by just going to sleep
It takes just one
Just a small sigh
It was on
Our minds
And when you let go
The fools say we're eyes
You dressed the part dog
There's no real surprise
Her myth
The fires burning but the leader got out
We take the medicine and you split it up
The towers burning just as long as we keep
Tonight falls just by going to sleep
Just take that medicine
Just take that medicine
Just take that medicine we heard all about
Just take your medicine and please don't make a scene
Just pack the magazine we heard about
It just takes one
Just one pill inside
I won't forget
It was on your mind
