## **Brain**

## N\*E\*R\*D

What do you think baby I know I want you And you know you want me But can you promise please You'll say yes to me I love how you think You think oh so deep And share your thoughts with me I buzz then fall asleepDo your really even love me If you do there is no pain Do I really even love you Or do I really love your brain I just love your brainsGirl unlatch your bra But first unlatch your jaw It's cool to call me dog But your head is under my paw Soon as your lips part Then your tongue it starts My pulse just races hard Enough to pop my heart I'm so highDo your really even love me If you do there is no pain Do I really even love you Or do I really love your brain I just love your brainsHands up, if you feel like that Hands up, if you feel like that Hands up, if you feel like that Yeah Huh what Yeah Huh what Yeah Huh what Head HeadThe things you think on me

HeadThe things you think on me
The games you play on me
And stay the day on me
The words you say on me
When we party hop

Bathroom countertop
Or in your old man's truck
Grocery parking lotDo your really even love me
If you do there is no pain
Do I really even love you
Or do I really love your brain
I just love your brains
