

# Genesis

## Cindergarden

a perfect match  
incorporeal design  
pieces fit  
string together warning sign in the distance  
coming into form  
netherworld symmetry  
a new arrangement born the genesis  
a puzzle slips in place  
the figure cast  
development in time and space silhouette  
shaping truth collide  
pulling you apart  
visceral decay inside far removed  
events to unevolve  
reaching through  
darkest mirror riddle solved fallen light  
underneath me still  
wickedness  
the only thing left to kill
