The Family

The Flys

Okay, this song is called 'The family'
And we got a close family of people we're working with
And we appreciate them
And this is a really appropriate number
Tell it to the family
You see it growing day by day
You know you sell it to the people
Making music our own way
You know you see it in our faces
See us out at the coolest places
Tell it to the family, yeah
Going to a movie
Tickets cost you two dollar fifty cent
Take your favorite girlfriend
You know she's of a Mexican descent
Tell it to the family
I see it growing day by day
You know you sell it to the people
Making music our own way
You know you see it in our faces
I see us out at the coolest places
Tell it to the family, yeah
Catchin' waves at sunset
The water there is cool but awfully dirty
Kickin' back at coffee

The waitress there is rude but really pretty
Tell it to the family
I see it growing day by day
You know you sell it to the people
Making music our own way
You know you see it in our faces
I see us out at the coolest places
Tell it to the family, yeah
Break it down
Tell it to the family
I see it growing day by day
You know you sell it to the people
Making music our own way

You know you see it in our faces
I see us out at the coolest places
Tell it to the family, yeah
Tell it to the family
I see it growing day by day
You know you sell it to the people
Making music our own way
You know you see it in our faces
I see us out at the coolest places
Tell it to the family, yeah
