

# I Speed at Night

Dio

Alright, Dark touches send rushed through the brain  
Black's whiter, burns brighter than the flame  
No shadows, just whispers in the wind  
No faces, just places to begin  
I just come seeking pleasure,  
I hate the light I speed at night, at night, alright My demons, they seem to disappear  
No vision, I only see to hear  
Protection, I never needed none  
Direction, just nowhere near the sun  
You've got some stairs to heaven,  
You may be right  
I only know in my world,  
I hate the light (I speed at night)  
Alright  
Dark touches send rushed through the brain  
Black's whiter, burns brighter than the flame  
No shadows, just whispers in the wind  
No faces, just places to begin You've got some stair to heaven, you may be right  
I only know in my world,  
I hate the light I speed at night I speed at night?  
I speed at night, night, night, night  
I speed at night, night, night, night  
No shadows, no faces, just whispers in dark places  
(I speed at night)
