

Repair

Built to be Broken

When you're confused
Or when you're scared
Or when you can't remember how you wound up here
Know that I care
And that I always will be right there
Just know that you can be repaired You've heard it before
You've heard from me
You've heard that little tiny voice you ran from desperately
All of the time
You wanna run from me
You run from me You're down on your luck
You're down to E
You know you're running out on all you dreamed so patiently
All of time
You wanna run from me
You run from me When you're confused
Or when you're scared
Or when you can't remember how you wound up here
Know that I care
And that I always will be right there
Just know that you can be repaired You've heard all the noise
From down the street
You know that everybody wants meet you eagerly
All of the time you wanna run from me
You run from me You've turned out the lights
You count to three
You hope the cameras couldn't follow you across the streets
All of the time
You want to run from me
You run from me Cause all along
You wanted all the lights to find you
But you don't know
Where the road you came from went to
