## Aesthetics Versus Architecture

It's not the same as it was when we started out  
When we liked it  
When everything was fine  
It's not the same as it was when we started out  
I wanna give you everything I never gave you but I can't afford the world  
I wanna give you everything I never gave you but I...  
Your salty lips kiss tragedy  
Just to spite me your salty lips kiss calamity  
Straight to the gallows  
But, they won't rid me of these things  
Straight to the guillotine  
It's not the same as it was when we started out  
When we liked it  
When everything was fine  
It's not the same as it was when we started out  
I wanna give you everything I never gave you but I can't afford the world  
I wanna give you everything I never gave you but I...  
I was once a king  
People exclaimed my name  
They cleared the streets for me  
But I will be known for the fires I start and the wars I cause  
I was a king  
It's not the same as it was when we started out  
When we liked it  
When everything was fine  
It's not the same as it was when we started out  
I wanna give you everything I never gave you but I can't afford the world  
I wanna give you everything I never gave but I...  
Tell me what it takes to breathe 'cause I can't define it  
Tell me what it takes to breathe 'cause I can't define it
