

Savior (Album Version)

No Motiv

So here we are again
wee all fighting it through the day
With one more obnoxious ass
that raining on my parade
and God only knows where I be
without you
to save me from disaster time and time again
wee two and together
wel never be defeated
Wel blaze a trail wherever we go
Somehow through all these years
Ie managed it on my own
With you to stand by me now
Il never have to show
All of the people that are trying to make a wreck
Il leave the world behind me
I'll leave them and not look back
Wel blaze a trail wherever we go
nobody in our way so let go
right now
