

# Better beware

## Geoff Useless

Dreams of contemplation, a resignation, know what  
Useless indignation, a segregation, plant your seed  
Steamless conversation  
Oh, what is happening to me?  
I'm no longer your erection  
Or your congregation, love your disease  
You take the sun  
You have your fun but you better beware  
You better beware  
You broke it down  
With that boring sound you gave to me  
That I don't wanna hear  
You're in some blind elation, a kind of delusion  
You don't get through to me  
Deliver your equation and still you won't see, a change in me  
You want my redemption, you want me to believe that it's all me

Well, I'm no longer your erection  
Or your congregation, I'm your disease  
You take the sun  
You have your fun but you better beware  
You better beware  
You broke it down  
With that boring sound you gave to me  
That I don't wanna hear  
You take the sun  
You have your fun but you better beware  
You better beware  
You broke it down  
With that boring sound you gave to me  
That I don't wanna hear
