

Don't Make It Slow (Blueroom Remix)

Global Citizen

You've had a problem lately
And you're losing your mind
I'm here to fix the problem
And to help you to relax and unwind
Five pints of blood from nihon
All the traits are there
Deep dark eyes, a tiny frame
And gorgeous long black shiny hair
And so it's down to business
It's time to pay the price
A quick coffee for two and then I'll have you shaken and stirred
With no ice
Your clothes, you rip them off
I'd not the time to strip them off
I may appear godlike but I'm not a man
Of that kind of cloth
Oh, don't make it slow
How you're gonna get through this night in one piece
I don't know
Oh, don't make it slow
We're breaking all known land speed records
In one go
You're on another planet
Nothing else seems so right
You're on another planet and
September snow falls tonight
Oh, don't make it slow
Push my fingers deep, deep
Down your throat
Oh, don't make it slow
I've got something for you that squeezes nicely in
Your glory hole
You're biting on the pillow, your nails rip through my skin
You're biting on the pillow, your nails rip through my skin
You're biting on the pillow, your nails rip through my skin
You're biting on the pillow, your nails rip through my skin
Oh, don't make it slow
How you're gonna get through this night in one piece
I don't know
Oh, don't make it slow
We're breaking all known land speed records
In one go
Oh, don't make it slow
Push my fingers deep, deep
Down your throat
Oh, don't make it slow
I've got something for you that squeezes nicely in

Your glory hole
