This Ship Was Built To Last

The Duke Spirit

Building a bridge across where we live
There are roots in my ground and I stretch across town
I couldn't care less if I live in my head
I've shed all my tears and I'm better than boredOh, this ship was built to last, yeah
Oh, this ship was built to lastMove your hands on, release me in love
Weather the rain and pleasure my skin
I'm building a bridge across where we live
I've fed all the hurt now, I just have to learnHow this ship was built to last
Oh, this ship was built to lastSee where she goes, that's where we go
The breeze takes my hand, this ship takes over, oohDrip upon drop overflowing the cup
Running in light, I whip multiple cries
They echo around all the walls of my heart
Yeah, worry no more when love leans 'gainst the doorOh, this ship was built to last
Oh, this ship was built to last
Oh, this ship was built to last
Oh, this ship was built to last
Yeah, this ship was built to last
