

# Together

## The Box Tops

Well, you should see me walkin' with my girlfriend  
Oh you would swear we both were one and its somethin' else, too  
Walk so close, can't tell where one ends, the other begins  
So much love, just ain't no way to tell You could see we make it together  
You could see the love look in our eyes  
You could see we make it together, forever You should love someone the way that I do  
Don't you know that your whole life's a stage?  
Tryin' to find somebody, gonna love you  
Love you like mine, if only for your own sake You could see we make it together  
You could see the love look in our eyes  
You could see we make it together, forever You could see a long-time love in action  
We're livin' and were lovin' our lives away, yeah Oh you could see we make it together  
You could see the love look in our eyes  
You could see we make it together, forever
