When you find a girl
You found a friend
If you wait too long
The story ends
If I look to you, you wave to me
I can't take it honestly
But I found you and there you are
But if the tides have turned
And washed ashore
But you gave me pain
I still adore
Now I ran them all, around for you
Can't believe that's all you do
And it kills me, and there you are
I can't take myself
I'm trying to help somebody else
Come along
Let's just get it straight
This is gonna have to wait
Too long
Make me strong
Hand it along
I don't have too long
And if I found the truth
You would lie
'Cause the place I move
Is on the side
And I wish for all these things for you
Keep it special, make it true
'Cause I found you and there you are
I can't take myself
And I'm trying to help somebody else
Come along
I can't get it straight
This is gonna have to wait
Too long
It's spread upon the seas
Will you always bring truth out of me?
I'm stuck
I can't take myself
I still need a lot of help
And love
