

Goodbye

Dave Gahan

It isn't very hard to see from where I stand
There's no one to blame
I opened up my eyes to see a world
With so much pleasure not pain
As she looked into my eyes
I knew I might not see her again
We're changing and it's hard for me
To stay the same
She, answers all the questions
Things I find so very hard to say
She, as I closed my eyes
I heard her whisper goodbye
All these questions that I'm asking
Feel very foolish anyway, goodbye
As I turned the corner I heard her whisper again
Goodbye is what she said
I loved her from the first time we kissed
She taste so great
She lit another candle and slowly
Fell into the flame
She, answers all the questions
Things I find so very hard to say
She, as I closed my eyes
I heard her whisper goodbye
All these questions that I'm asking
Feel very foolish anyway, goodbye
As I turned the corner I heard her whisper again
Goodbye is what she said
