My Angel

Charlie Wadhams

I finally stopped time
So we don't have to think about the hustle outside
I have a surprise
Tomorrow amounts a year that you've been here in my life

I don't need much help to decide
Whether it's been good for my mind
To have you around
To have you around

It's good to sit down
After years of standing up for something I've never found
Right next to the smile
My angel started wearing since her feet left the ground

I don't need much help to decide
Whether it's been good for my mind
To have you around
To have you around
