

This Orient

Foals

And now it's just gone after dark
And we move to the other part of it
Secret part of your restless heart
To glide past every city light
Like a satellite careering through the sky
This color, this summer night
It's your heart, it's your heart
That gives me this western feeling
It's your heart, it's your heart
That gives me this western feeling
Do you know, you give me
You give me this western feeling?
Now look back see how far you've come
Will you unravel in the sun?
Come undone, find your place
Held up high said from string as well
No return to that restless place
You've reached it, you've found your grace
It's your heart, it's your heart

That gives me this western feeling
It's your heart, it's your heart
That gives me this western feeling
Oh, do you know, you give me
You give me this western feeling?
It's your heart, it's your heart
That gives you this western feeling
It's your heart, that gives you
That gives you this western feeling
It's your heart that gives you
That gives you this western feeling
It's your heart, it's your heart
That gives you this western feeling
Oh, how do you know, what gives me
What gives me this western feeling?
Oh, how do you know, what gives me
What gives me this western feeling?
