

Taxi

Monica

[Verse 1:]

Baby I love it

All your future dreams and everything you promised me

Baby I love it

The material things but they don't mean that much to me

It could all go, tomorrow but you're the only one I'll ever need

If I can't please you and you can't please me

Then call me a taxi[Bridge:]

I will give it all away, take everything I have from me

There ain't nothing that can take your place, cause love ain't material things

I don't care if we don't have much, we still got love, it should be enough

But if I can't please you and you can't please me

Then call me a taxi[Chorus:]

Money ain't everything

I could've been everything you needed babe

And if you want me to stay, I'm telling you something has got to change

We could struggle to the end or just don't let go, love is all we really need

But if you think money makes me happy

Then call me a taxi[Verse 2:]

Baby don't stress your mind cause riches ain't worth a dime

(No it ain't worth it)

If it takes all your time

I'm here left alone, I cry

I can't gamble if I don't know what's inside

But if you rather your things instead of me

Please call me a taxi[Chorus:]

Money ain't everything

I could've been everything you needed babe

And if you want me to stay, I'm telling you something has got to change

We could struggle to the end or just don't let go, love is all we really need

But if you think money makes me happy

Then call me a taxi[Verse 3:]

Let's be clear on what is real

Cause if we don't then I'll lose this feel

Ain't nothing wrong with reaching goals

But what matters to me the most

Is that further down the road, we could finally be everything that I wished for(If we can't be happy babe, call me...)[Chorus:]

Money ain't everything

I could've been everything you needed babe
And if you want me to stay, I'm telling you something has got to change
We could struggle to the end or just don't let go, love is all we really need
But if you think money makes me happy
Then call me a taxi
