

Live That Long

Lewis Del Mar

X-ray mornings and the mirror cracks again
bad luck making and my bones are breaking in
This is the year that the years caught up to me
Sinking eyes and my thin vacation days
Do i grow or do I fade away?
Do i talk about how things have changed? Cause I won't live that long
No i won't live that long
but it don't feel wrong When our minds are gone
on the roof at dawn
no I won't live that long x-ray evenings cross examining my kiss
cross my heart before I lie straight to your face
I said I believed our best years have yet to take place
but i don't really believe in anything
Cause now I know that all plans fade away
So i'm only planning for today Cause I won't live that long
No i won't live that long
but it don't feel wrong When our minds are gone
on the roof at dawn
no I won't live that long Understand me when I say
All i had I gave away
all i had i gave away Understand me when i say
all i had i gave away
all i had i gave away Understand me when I say
all i had i gave away
all i had i gave away Understand me when I say
all i had i gave away
all i had i gave away
