Seasons

Near Miss

Everything around me standing still
Down again and lost the will
So sick again the world cries
So you break the tears
And you wipe the timesLost the words, leave the light on
Never found, still always gone
I try not to drink it all away
Lost the words, leave the light on
Never found, still always gone
Blazed again I wished it all awayAnother winter dayIt's been so long since I saw the sun
Wake me up and call my name
Every season's the same
These are the days I truly hate
And sunshine's never changing my faith
I'm out of luck, it's been so longLost the words, leave the light on
Never found, still always gone
I try not to drink it all away
Lost the words, leave the light on
Never found, still always gone
Blazed again I wished it all awayAnother winter day
