Out the Blue

Nuuxs

Out the blue
see your hand
reaching out
wondering
How to get
close enough
tell me now
But I can't let you care 'bout me
no, I won't let you care 'bout me
if you do whatever baby
but for you just forget about me

This is more and more
you and I
but can't you take
me of your mind
what do you think
you take away

I've freedom for the first time
but you
if only you could leave it there
I'm speaking in the silance
But you talk too loud to care
If only you could leave it there
leave it there

Winded up
in your head
out your mind
falling
Deep it in
to take control
of your life
but you keep trying to chek upon me
when my car's already calling for me
better stop cause you're looking crazy
baby, please forget about me

This is more and more

you and I
but can't you take
me of your mind
what do you think
you take away

I've freedom for the first time
but you
if only you could leave it there
I'm speaking in the silance
But you talk too loud to care
If only you could leave it there
leave it there

This is better left alone
d
you gotta lay all to waste
never looking back

To the time that when we were breaking each other
so never look back

I've freedom for the first time
but you
if only you could leave it there
I'm speaking in the silance
But you talk too loud to care
If only you could leave it there
leave it there
