Get Away

Goldfinger

You ask me how I stay the same
After I'd seen everything
Could be the company I keepYou say I've got something you need
But what I have I just can't sell ya
'Cause my experience runs deepYou wanna be a brave man
But you just can't face your fear
You only know what you can doYou say get away from me
Just get away from me
Just get away from me
'Cause I might tell you somethingYou think the world owes you a debt
And they should hand you your success
But you won't find it on TVYou cry about the luck you've had
You wear your bruises like a badge
You won't heal until you're willingSo now you think you need my help
But you're just too scared to ask
We'll, I've been scared before my friendGet way from me
Just get away from me
Just get away from me
'Cause I might tell you somethingJust get away from me
Just get away from me
Just get away from me
'Cause I might tell you somethingGet way from me
Just get away from me
Just get away from me
I might tell you somethingJust get away from me
Just get away from me
Just get away from me
'Cause I might tell you somethingJust get away from me
Just get away from me
Just get away from me
'Cause I might tell you somethingSomething, something, something, anything I'll tell ya
Something, something, somethingGet way from me
Just get away from me
Just get away from me
'Cause I might tell you something
