Ladyshave

Gus Gus

Steam slowly builds up now
Between my ears there is fog now
The soothing sounds of your shower
Make my life this hourI guess I must have messed it up
I guess I must have messed it up
I guess I must have messed it up
When I gave you the ladyshaveYour heart's a pumping bass and I like that, yeah
My heart is missing pace and I like that
A ladyshave I can see now, ho ho
A ladyshave now I know how
Now I knowI guess I must have messed it up
I guess I must have messed it up
I guess I must have messed it up
When I gave you the ladyshaveA lay, a lay, a lay, a ladyshave
I can see now
That to do, to do, to do the ladyshave
Needs a know-howI guess I must have messed it up
I guess I must have messed it up
I guess I must have messed it up
When I gave you the ladyshaveI guess I must have messed it up
I guess I must have messed it up
I guess I must have messed it up
When I gave you the ladyshaveI guess I must have messed it up
I guess I must have messed it up
I guess I must have messed it up
When I gave you the ladyshaveI guess I must have messed it up
