Love And Fear

We Shot The Moon

I hear a voice but I don't believe it
I see a sign but don't stop to read it
I'm coming clean
Just let me roll up my sleeves
Losing control outside of Denver
I walked alone in the heart of December
It cuts like a knife
With a blade that is sharper than hell
I took a flight from LA to Missouri
Up all night
Too many worries in the air
Taking pills, can't sit still
Made up my mind, sleep deprived
Wear and tear
I can't see clearly
Is this love?
I took a flight from LA to Missouri
I told the voices in my head not to worry
But when I opened my eyes it was still unclear
If it's love, or is it fear?
You called the bluff that I didn't mean it
Full of regret the moment I landed
You're turning your head
Where did we lose our way
I told a lie
You made a promise

I couldn't keep my end of the bargain
So we sit alone at a table without a view
I took a flight from LA to Missouri
Up all night
Too many worries in the air
Taking pills, can't sit still
Made up my mind, sleep deprived
Wear and tear
I can't see clearly
Is this love?
I took a flight from LA to Missouri
I told the voices in my head not to worry

But when I opened my eyes it was still unclear
If it's love, or is it fear?
Is it love or fear?
Is it love or fear?
Is it love or fear?
Is it love or fear?
We sit alone
I took a flight from LA to Missouri
I told the voices in my head not to worry
But when I opened my eyes it was still unclear
If it's love, or is it fear?
Is it love or fear?
Is it love or fear?
Is it love or fear?
No I don't, no I don't, no I don't know
