## I Never Stopped Loving You

## **Survivor**

From a distance I can see
The picture looks so clear to me
It's a vantage point so few can hope to find
And patience held the key
Our love, our only guarantee

Our destiny to make it through the nightThrough the tears and through the pain

This house was built to stand the strain

Though harder times, I surely can't recall

And crazy as it seems

Though all we had were crazy dreams

Those hungry years I'll miss the most of allNow at last, we fall together

We've been through it all together

Ooh, I never stopped lovin' you

When the money was short and dreams were shattered

Faith in love was all that pulled us

Through, I never stopped lovin' youI've stumbled on the way

So many nights love went astray

At different times we each played separate fools

But love became our pride

When once we'd seen the other side

Every highway led me back to youThrough the wind and through the rain

This house was built to stand the strain

Though harder times, I surely can't recallNow at last, we fall together

We've been through it all together

Ooh, I never stopped lovin' you

When the money was short and dreams were shattered

Faith in love was all that pulled us

Through, I never stopped lovin' youFrom a distance I can see

The picture looks so clear to me

A vantage point that only love can find
