Firestorm

Conchita Wurst

Love is like a potion
It's a chemical
So lead me to the water
Like an animalBut you, you could never hold me
I could never hold you down
And I can't get enoughMy heart is a firestorm
And all that I needed was your flame
And now that you're gone out the door
Tell me who could love you moreMy heart is a firestorm
And all that I needed was your flame
And now that you're gone out the door
Tell me who could love you moreTell me who could love you
Who could love you baby
Tell me who could love you moreLove is like a river
Let me drift away
Skin on skin
Don't wake me up againBut you, you could never hold me
I could never hold you down
And I can't get enoughMy heart is a firestorm
And all that I needed was your flame
And now that you're gone out the door
Tell me who could love you moreMy heart is a firestorm
And all that I needed was your flame
And now that you're gone out the door
Tell me who could love you more
