Iris (feat. The Eden Project)

Friendzone

Don't look back, we're here to stay
A life we knew gone one day
And this is it, the borderline
To where the future leaves us behind
The fire will burn and never die
Look in through the eye of a brand new life
And so just find me, just find me
Sparks will fly if we scream now
This is not how we're gonna go
We are the ones to never let go
Just watch you swirl to where no one know

We'll never grow
We'll never grow

Don't look back, we're here to stay
A life we knew gone one day
And this is it, the borderline
To where the future leaves us behind
The fire will burn and never die
Look in through the eye of a brand new life
And so just find me, just find me
Sparks will fly if we scream now
This is not how we're gonna go
We are the worlds to never let go
Just watch you swirl to where no one knows

We'll never grow
We'll never grow
We'll never grow
