Blue Island

Noel Harrison

Living in a world that dies within
You are they who try and touch the wind
You could be a blessed one
That makes me love you
Doin' what you've never done before
Takin' every wave that hits the shore
You could be a silver star
That shines on my blue island
Gonna be in blue island
See you on a blue island
Take you to a blue island
Blue island
You can see the rain
You can feel the pain
That no part of me is goin' through
Everybody say
We can find a way
Do you know the place you're going to?
You're going to a blue island
This is what the lonely heart must know
This is what it takes to make it grow
You can be a child alone
But you may save the world
Maybe it's the words that mean goodbye
There but for the grace of God go I
I can see an open door
Leads to my blue island
It's gonna be in blue island
See you on a blue island
Take you to a blue island
Blue island
Blue island
Blue island
