Follow Me

Sarah Bettens

Someday, I'll stop tryin' and I'll know
How much time I've wasted always wanting more
I doubt you'll end up where you need to be with me
I tend to run in circles while I swim in my own seaI can run and play and dive into the ocean
I can touch the sand and feel it slip awayYou could follow me
I don't know where I'm goin'
You could follow me
You could follow me
It might not be the smartest thing to do
But you could follow me, ahhI want you to be happier than me
I'm a poor example of a carefree human being
Here's a list of things I wish to be
Your pillow and your blanket and your life time guaranteeI can love you all the way across the ocean
And I doubt that that will ever go awayYou could follow me
I don't know where I'm goin'
You could follow me
You could follow me
It might not be the smartest thing to do
But you could follow me, ahh, ahhIf I ever stop believing there's a reason for my life
I might as well stop trying to make sense of what is right
You could follow meYou could follow me
I don't know where I'm goin'
You could follow me
You could follow me
It might not be the smartest thing to do
But you should follow me, ahh, ahh, ahh
