

Feel It in Your Heart

Cold

Can't run away from love
If you cannot feel
Everything falls apart
In a tragedy
I am so far away from gone
I just want to be here
Everyone falls apart
In my symphony Can you feel this in your heart
Can you take it to your soul
I don't want you to pretend
I don't want to be alone Feels like i'm torn apart
And I cannot bleed
Caught in the web we made
This just can't be real
I am so far away from gone
I just want to be here
Everyone falls apart
In this tragedy Can you feel this in your heart
Can you take it to your soul
I don't want you to pretend
I don't want to be alone Can you feel this in your heart
Can you take it to your soul
I don't want you to pretend
I don't want to be alone I don't want to be alone
Everyday
I live through this
Inside
I've changed
Everyday
I don't want to be alone Can you feel this in your heart
Can you take it to your soul
I don't want you to pretend
I don't want to be alone Can you feel this in your heart
Can you take it to your soul
I don't want you to pretend
I don't want to be alone Inside
I changed
Everyday
I live through this

Inside
I've changed
Everyday
I live through this
Alone I don't want to be alone
I don't want to be alone
