

# Avenues & Alleyways

## Rancid

I figured out the problem yeah the problem is you  
You didn't see us comin' now there's nothin' you can do  
Times are gonna change, change or step aside  
It's my point of view that took you by surprise The sun's comin' up yeah the new dawn arrives  
New generation standing stand with anger in their eyes  
No love in the city 'cause there's no connection  
Been stricken with disease a racial infection I'm a battering ram comin' through to you  
In every alleyway and every avenue Actions could erase all the fear that we suffer  
People segregated no one understands each other  
He's a different color, but we're the same kid  
I will treat him like my brother he will treat me like his Well an eye for an eye yeah a tooth for a tooth  
Brother against brother should be singin' with the group  
The inner cities burnin' yeah it's screamin' black and blue  
The power and the passion of a million youth I'm a battering ram comin' through to you  
In every alleyway and every avenue I figured out the problem yeah the problem is you  
You didn't see us comin' now there's nothin' you can do  
He's a different color but we're the same kid  
I will treat him like my brother, he will treat me like his All the blood that spills of all the guts that fly  
The media paints a picture that stands all arise  
Pits dogs against cats now who is responsible  
The power in the issue, the force is unstoppable I'm a battering ram comin' through to you  
In every alleyway and every avenue I'm a battering ram comin' through to you  
In every alleyway and every avenue I'm a battering ram comin' through to you  
In every alleyway and every avenue
