

That's What We Do (feat. R. Kelly)

Ashanti

Written entertainment Ashanti

Kells, gotta get this one off my chest Now Ima look through your phone

And Ima call back that number

Ima curse out that hoe, and let her know to stay away from ya

Cause thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do I may accuse you a little, and go through your jeans

When I dont find anything, all that it means is that

I love you, dont want her touching you

Dont want her fucking you, yeah, cause that what we do

I may get a little jealous, take you away from the fellas

Cause I want your time, and Im all over you that night

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do I may blame you for something, and dont want to apologize

Ima climb in that bed, and show you Im sorry

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do Through the storm, through the rain

Through the heart ache, and pain

We fuss, we fight, with all our might, won side by side, we survived

When your chance has come back, and the royal stuff, going round

We fuss, we fight, with all our might, won side by side, we survived You ran out the house, and I chase after you

Cursing each other out, now what we put each other through

Cause thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, You called your mothers crib, said you were going over there

Then I took the keys and hid em, so you couldnt go nowhere

Cause thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do, thats what we do

Thats what we do Sometimes you can make me mad, and I can make you cry

But when things get bad, we stand right by each others side

Cause thats what we do, thats what we do

Thats what we do, thats what we do
Thats what we do, thats what we do
Thats what we do, thats what we do
Thats what we do I walk out the door, and you scream whatever
We make love that night, and were right back together
But thats what we do, thats what we do
Thats what we do, thats what we do
Thats what we do, thats what we do
Thats what we do Through the storm, through the rain
Through the heart ache, and pain
Listen Baby, We fuss, we fight, with all our might, won side by side, we survived
When your chance has come back, and the royal stuff, going round
We fuss, we fight, with all our might, won side by side, we survived There aint nothing that can ever stop our
love
Because our love so tough sent from heaven above
Then should raise the flag, high above
Take the hands, miss Luna
Cause when were together, there aint nothing better
My life is complete, Ima love you forever
We should rent some space, get some tools, build a statue of me and you Through the storm, through the rain
Through the heart ache, and pain
We fuss, we fight, with all our might, won side by side, we survived
When your chance has come back, and the royal stuff, going round
We fuss, we fight, with all our might, won side by side, we survived
