Never Be Forgotten

Jessica Andrews

Advisory - the following lyrics contain explicit language:

I'll always see your face
The corner of your smile
And all the little things
No one will ever knowLike it was yesterday
Won't ever fade away
Goodbye is just a word
I will never sayYou will never be forgotten
A million days could pass us by
But what is time but just a dream
I still feel you here with me
You're more than just a memory
You will never be forgottenI can't hold your hand
Or look into your eyes
And when I talk to you
It just echoes in my mindBut if hearts are made of dust
And if we fell from the stars
I look up tonight
And know just where you areYou will never be forgotten
A million days could pass us by
But what is time but just a dream
Well, I'll still feel you here with me
You're more than just a memory
You will never be forgottenAnd the world just keeps on going
It has no way of knowing
That you're goneYou will never be forgotten
A million days could pass us by
But what is time but just a dream
Well, I'll still feel you here with me
You're more than just a memory
You will never be forgotten, forgotten
