

# Before

## Plants and Animals

Love me now and leave me in the spring  
Sun done come and changed everything  
What looked good in the winter don't look good no more  
Forget about me and everything that came before  
Before Open your heart before you make that choice  
You're just a child  
Lucky red nine with a beautiful voice  
Memories I've kept from before  
From before  
From before  
From before Only another day
