

# Sugar In The Sacrament

## Thursday

What have you done?  
You followed footsteps in the dark  
You found your faith, left out behind your father's car  
Over you it's always out of reach?  
I'm sinking still right into  
Oh my God, where are we now?  
Fractured lives dissolving like sugar in the sacrament  
If it was just one night then we would be released  
Tie this knot between our teeth keep tearing open bottles  
Let it bleed tonight  
Where have you gone?  
Off with the friends you couldn't keep  
Your mother's arms fill up with all the empty needs  
So the saints line up to bring her in  
Comfort her and it's always comforting  
When they start to sing, the same old

?Holy, Holy, lift up your dress  
Feel your body dissolving like sugar in the sacrament?  
If it was just one night then you could be redeemed  
Tie these sins between your teeth make hollow promises  
We'll never keep tonight  
This is all we've ever known of God  
Fight with me, let me touch you now  
This is all we've ever known of God  
Fight with me, let me touch you now  
This is all we've ever known of God  
Fight with me, let me touch you now  
This is all we've ever known of God  
Fight with me, let me touch you now
