

# Safe Place

## Plej

Another day inside my world  
I'm married to you and this road  
The road that never lets me sleep

There's no way to escape these demons I am forced to keep  
And then I find you here  
Through your eyes every thing's clear

And I'm home inside your arms  
But I'm alone for now  
I mean the best with what I say  
It doesn't always sound that way  
I never learned to work things out

'Cuz in my family all we ever seemed to do is shout  
And then I find you here  
Through your eyes every thing's clear

And I'm home inside your arms  
But I'm alone for now, alone for now  
And I try to sleep

The drugs I take are killing me  
I think of you to ease my pain, but you're so far  
And now its time to say goodbye

I love you baby, please don't cry  
And then I find you here  
Through your eyes every thing's clear  
And I'm home inside your arms  
But I'm alone for now, alone for now
