Bright

Glass Vaults

I think the universe is on my side
Heaven and earth have finally aligned
Days are good
And that's the way it should beYou sprinkled stardust on my pillowcase
It's like a moon brushed across my face
Nights are good
And that's the way it should beThey make me sing ooh la la la
They make a girl go ooh I'm in love loveDid you see that shooting star tonight
Were you dazzled by the same constellation
Did you and Jupiter conspire to get me
I think you and the moon and Neptune got it right
Cus now I'm shining bright
So bright
Bright, so brightAnd I see colors in a different way
You make what doesn't matter fade to grey
Life is good
And that's the way it should beYou make me sing ooh la la la
You make a girl go ooh I'm in love loveDid you see that shooting star tonight
Were you dazzled by the same constellation
Did you and Jupiter conspire to get me
I think you and the moon and Neptune got it right
Cus now I'm shining bright
So bright
And I get lost in your eyesDid you see that shooting star tonight
Were you dazzled by the same constellation
Did you and Jupiter conspire to get me
I think you and the moon and Neptune got it right
I think you and the moon and Neptune got it right
I think you and the moon and Neptune got it right
Cus now I'm shining bright
So bright
Bright, so bright
Bright, so bright
And I get lost in your eyes tonight
