

# Party for Your Life

## Down With Webster

Party for the rest of my life  
Call it what it will be  
You say you wanna do it right  
Yeah, you should come with me  
Before I go out I'm wondering what you're doing and what you're doing to me  
So party like the rest of us and you'll be where you should be

Dead end job by day  
I think it's time to pay up  
Together we won't grow old  
Shots for the road  
Party for your life, party for your life [x2]  
Together we won't grow old  
Party for your life, party for your life

Bottles for the rest of the night  
Here's to what never should be  
Blinded by city lights  
Caught up in your own dream  
Don't hold back now  
You're the life of the party so go and party for life  
And do it like the rest of us and you'll be where you should be

Dead end job by day  
I think it's time to pay up  
Together we won't grow old  
Shots for the road  
Party for your life, party for your life [x2]  
Together we won't grow old  
Party for your life, party for your life

Fan the hammer and RELOAD  
Cam in this and I'm back like WHOA  
I don't see you, I just cups  
Now line 'em up in this bitch like YUPP!

Bucky Buck and I'm loaded up 6 deep and I'm rolling up  
1 shot, 2 shots, 3 shots and I'm going nuts  
I still tip, but I never spill  
Every time I go overkill

When the beats bang, I head bang

Go black and decker, you know the drill  
You know me, I'm that crazy boy all upbeat, no lazy boy  
I break shit, no decoy  
Push the button, I deploy

Dead end job by day  
I think it's time to pay up  
Together we won't grow old  
Party for you life, party for your life

Party for you life, party for your life  
Together we won't grow old  
Party for you life, party for your life  
Party for you life, party for your life
