

# Waited My Whole Life

## Cracker

I don't pick up pennies, I don't knock on wood  
Step on the cracks a little more than I should  
Lucky it ain't nothin' now I got you I don't cross fingers behind my back  
And I don't mind dark cats crossing my path  
Silly superstitions don't mean a thing One way of another  
We were meant to be together  
I waited my whole life  
Just to be with you  
I know it sounds crazy, but listen to me baby  
I swear that it's true  
I've waited my whole life  
Just to be with you I like your smile, get lost in your face  
The sound of your feet across the floor of my place  
Make y'self at home, come settle on in The way you wake up with your hair all a mess  
Driving me crazy girl, I just confess  
If there's a fault, I can't find it with you One way of another  
We were meant to be together  
I waited my whole life  
Just to be with you  
I know it sounds crazy, but listen to me baby  
I swear that it's true  
I've waited my whole life  
Just to be with you (Just to be with you)  
(Aah) (Just to be with you) One way or another  
(Just to be with you) We were meant to be together  
(Aah) I waited my whole life just to be with you
