

# Make You Happy (miami Edit)

Mika

All I wanna do is make you happy x6  
All these years of trying  
If I said I'm happy, I'd be lying  
Think it's love we're making?  
But if this is love then watch me die on you  
Oh maybe you can't hear me  
But I feel like screaming when you're near me  
Save me from your theories  
At the very least just let me cry on you  
Undervalued  
Love is a bolt from the blue  
If only you knew  
But you were so far from the truth  
All I wanna do is make you happy x6

A heart's a lonely hunter  
We can't fight the cold and fight the hunger  
Who can you rely on?  
Can you share the shoulder that you cry on?  
You talk, how can I listen?  
When I hear the people's screams  
Telling me the things I should believe in  
I'll show you what I'm made of  
They can't cover up for me  
Because there's nothing I'm afraid of  
Undervalued  
Love is a bolt from the blue  
If only you knew  
You were so far from the truth  
All I wanna do is make you happy
