

# Black in the Burn

## Masterplan

Stranger in a foreign land  
I reach for you so take my hand  
Torn inside, I give the best I can  
Crave to feel and throw the dice  
We'll make another sacrifice, yeah  
Bring me the light, show me paradise  
Forever fighting in this shadow land  
Come wind, rise fire  
Cool wind, warm fire, inspire me to live  
Cold rock, I know you from my years of pain  
I must find my strength again, alright  
And the story will be told  
After life has been broken  
My voice will return  
Melting the steel, close to the sun  
Dreaming away from this nightmare  
A digital world where everyone feeds on lies  
Falling from grace, the human race  
Religion can never unite us  
Only a few who stay on the barricades  
When the news are heard 'bout the fallen bird  
Sing my song so you can remember  
I just wanted to be here forever you see  
To create my soaring melody  
And I'm black in the burn, alright  
Over the edge to the other side  
Your enemy waits in the darkness  
You must be strong and prepare for a change in time  
Heaven is hell, no one can tell  
Illusions of holiness blind us  
A fragment of time is all that you'll ever know  
When the news are heard of the fallen bird  
Sing his song so you will remember  
He just wanted to be here forever you see  
And create his soaring melody  
Deep in the cold, is it the end, I surrender to you  
Always a mystery, destiny  
Far from home, we're all alone  
Heavy heart, no escape  
Death will take us all away  
Down in my darkness fights the demons in me  
Can you hear me now?  
I'm sending madness, madness from below  
No one can save the warrior soul, no  
Welcome to this nightmare  
When the news are heard of the fallen bird  
Sing his song so you will remember  
He just wanted to be here forever you see  
And create his soaring melody  
Oh, we crave to feel and throw the dice  
It's just another sacrifice  
Black in the burn  
There's no returning  
Oh, turning black in the burn
