

# Darker Days

## Mushroomhead

Finish what you fold up, digest, lock away  
confiscate the sins to cleanse the brain  
Six feet under, Six feet down  
there ain't no way that you're keeping me, pulling me  
Six feet under, Six feet down  
there ain't no way that you're breaking me, taking me  
DownAnd it happens everydayDivisible by moments fed the human race  
Pontious read the riot-act, of your hate  
We used to give the love, but that was never enough  
there ain't no way that you're breaking us, taking us  
for a ride again, that was way back when  
we used to give the love, but now we're out for bloodKill for any reason, left to pray  
as you feed yourself Religions  
god did not create  
We used to give the love, but that was never enough  
there ain't no way that you're breaking us, taking us  
Six feet under, six feet down
