More Than Air

Local Sound

I was a flame burning out
Drawing circles with my heart
Didn't know where to run

When the light was turning dark
Found You there by my side
Reaching for me
When I lost control

Now I'm fighting to recall
Finding fear in the fog
And You're better than I know

You are all I want
Running straight to Your love
Filling up my lungs
I need You more than air

I give You myself
Want You and nothing else.
I need You more than air.
Need You more than air

I need You more than air

In the race to the prize
You are with me from the start
In a world spinning wild
You will never fall apart
When I look to Your love
I find everything I need and more

Now I'm fighting to recall
Finding fear in the fog
And You're better than I know

You are all I want
Running straight to Your love
Filling up my lungs

I need You more than air

I give You myself
Want You and nothing else
I need You more than air
Need You more than air

I need You more than air
