Promises

Basia

Promises
We forgot all our promises
And only keep some of the easiest
I confess I doMake believe
However small the possibility
But sometimes tripped up by reality
Formality it seemsNow I foundHaving come the long way roundI am closer, closer than beforeHere and now is all that it's about
Let's use it or we'll lose itGo and ask anybody
They will all say the same, everyone
Love is contagious
We are part of a chainHistoryWe could live our life from historyBut there's no future in a memory
You'll see, my love
Oh,there's no future in a memory
You'll see, my loveNow I foundHaving come the long way roundI am closer, closer than beforeHere and now is all that it's about
Let's use it or we'll lose itGo and ask anybody
They will all say the same, everyone
Love is contagious
We are part of a chainGo and ask anybody
They will all say the same, everyone
Love is contagious
We are part of a chainYou'll see, my loveGo and ask anybody
They will all say the same, everyone
Love is contagious
We are part of a chain
